Services & Solutions

- Our team of Engineers is continuously researching and developing new technology to allow our product line to evolve with the changing needs of the ICT world.

- Our range of solutions has been focused on both the private and public sector in the following areas:
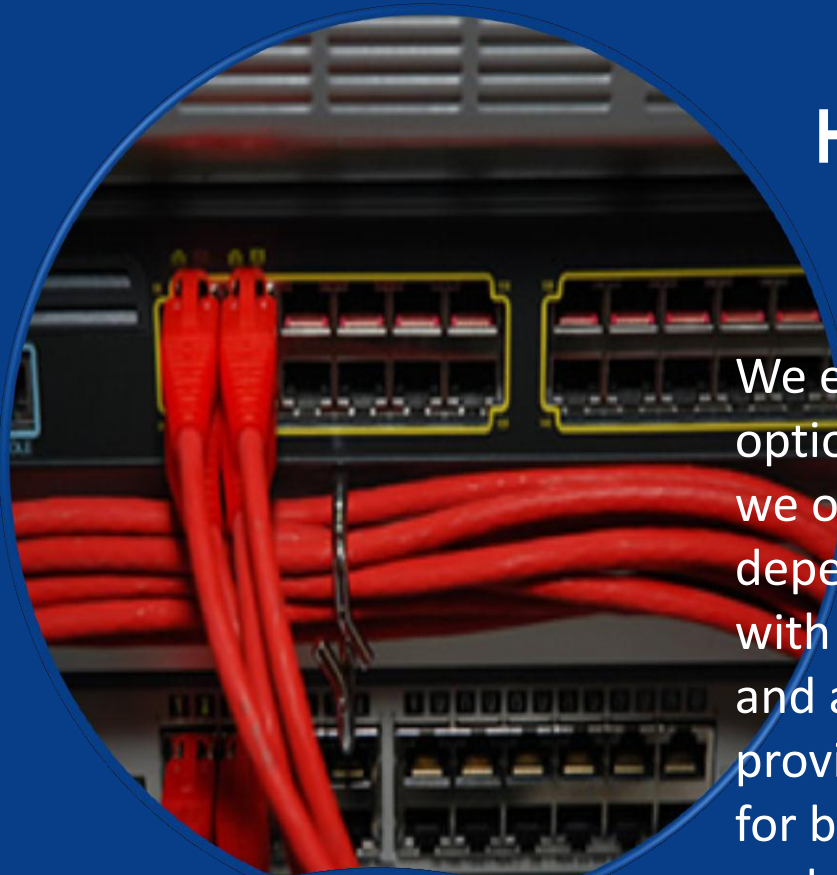

Our Task.

Our task will involve:

- Designing your website according to your specifications, putting in mind the appropriate color schemes and the type of content. I.e. making it attractive by coming up with a good architectural interface.
- Domain Registration.
- Hosting Solution.
- Setting up and Integrating a web system counter, timer and calendar. This will be showing the number of visitors to the website, the date, time and day on the website in real-time.
- Uploading and publishing the website online.
- Updating your website once the website is up and running.
- Creating and Updating the animations and Media Center; for photo gallery, news and events.
- Checking and correcting any errors on the website if it occurs
- Checking and correcting any broken links
- Offering any other required support when and where necessary.

Hosting Services.

We endeavor to provide our clients with various options pertaining to their specific needs; hence we offer web hosting services on various platforms depending on your requirements. Get in touch with us and we will be glad to assess your needs and advice you accordingly. This is usually providing website and email remote server space for business communication and enterprise mobility.

Domain Registration Services

To have your own presence on the World Wide Web, you've got to have your own unique name or address; also known as a domain name. Your domain name has various uses notably for email, websites and so on.

Website Design & Development Services.

Whatever your business needs, you have come to the right place.

Charles Makori Networks is prepared professionally to help you establish a strong web presence. We are well versed with all aspects of web design and hold a strong record of delivering sophisticated, professional and attractive trendy websites.

Management Team

Well run with experienced and committed Board of Directors. The Board Members have all provided valuable:

- programmatic.
- administrative.
- financial.
- legal &
- technological service.

Our People
Charles Makori Networks prides employing dedicated personnel who have many years of proven experience in our core services and customer relations.
As a middle sized company, we have achieved so much out of our passion and dedication to serve our clientele in tandem with our mission statement.
In all areas of evaluation including total years; clients served; quality of service offered; the integrity of our personnel among others is only second to none.

People & Values

We know that a crucial aspect of any organization is getting the right people: senior, experienced, specialist professionals, who will work flexibly and alongside the field and programs team to ensure success.

Our team comprises of staff with the experience and skills required to deliver in this kind of engagement. In this section we introduce the team that we will field on this assignment, a team comprising of experienced staff with a combined skill set that covers the key areas of specialism.

We believe in our staff's ability to provide our clients with the best in value and service.
Our people make us different - energetic about supporting and challenging our clients in equal measure.

We're passionate about making a measurable impact in all we do. Our unique culture and approach deliver enduring results, true to each specific situation. We have a collaborative working style that emphasizes teamwork, trust, and tolerance for diverging opinions.

Our Hosting Technology

We operate a number of data centers across North America. Each data center we operate from is a Tier IV, carrier neutral data center facility, often known as a "carrier hotel". We maintain private suites or cages within these facilities and our web servers are located within these private suites. Unlike many of our competitors, we do not rent or resell from a larger provider and use our own hardware for our servers and our network. The benefit of this is we are fully in control of all of the hardware and technology we use to deliver our hosting services.

The locations are chosen for their connectivity, availability of reliable power and most importantly, in a NATURAL DISASTER FREE ZONE

Our Atlanta data center is a 40,000 sq foot, SAS70 certified facility just 1 mile from the heart of downtown Atlanta.

- 40,000 square foot facility
- SAS 70 type 2 certified
- 10Gbe network to Mzima, Telia and nLayer
- 100% Cisco powered internal network
- N+1 redundant power and climate control systems
- Multiple generators with 7 days worth of fuel onsite
- Category 5 Hurricane resistant facility
- Fully staffed 24x7x365

Faster web hosting

Everything we do is fast. From the fastest web servers, to the fastest support to getting you online even quicker, we're all about speed. We setup your web hosting within minutes of you signing up.

Reliable web hosting

We hate downtime. And so should you. Everything we do is tailored around delivering our customers reliable web hosting. We maintain private suites in Tier III and Tier IV data centers and we monitor our government grade Dell, HP and Supermicro web servers around the clock to make sure they're online and powering your website.

Satisfaction guaranteed

Happy customers are our bread and butter. We go above and beyond what our competitors offer to deliver you a happier, more pleasurable web hosting experience.

We've been offering hosting for 10+ years... This makes us experts. We're very good at what we do and our experience means the service you receive and enjoy is second-to-none.

Choose a hosting company with a highly recommended brand and a proven track record. Choose **Charles Makori Networks.**
